25X1 MEMORANDUM FOR: [REDACTED] ORR/I/GM

SUBJECT : Transporter Trailer for the SHYSTER SS-4 Missile

REFERENCE : Requirement No RR/E/R71/59  
PIC Project No P 368-59

1. This informal report is in answer to requirement no. RR/E/R71/59 dated 11 December 1959 concerning the dimensions and characteristics of possible missile trailers reportedly observed in East Germany.

2. A study of the photography reveals that the missile trailer is not fully shown in either photograph. The trailers probably extend onto the next flat car and because of this the total length of the trailers cannot be determined. The portion of the missile trailer that is shown on the photograph, which has a sentry appearing on the right side, measures approximately 13 meters.

25X1 A comparison of the under carriage on the front portion of these trailers with those of the trailers carrying the Shyster missile in the [REDACTED] [REDACTED] reveals a mark similarity. The bulges on the canvas cover also compare favorably with the general configuration of the Shyster missile trailer.

On the basis of this comparison it is believed that these canvas covered trailers are the transporter trailers for the Shyster SS-4 missile.

[REDACTED] 25X1  
Chief, Photographic Analysis Division
